AMINO ACID SUPPLEMENT + PROBIOTICS

OPTIMIZE EXERCISE CAPACITY / MAXIMIZE RECOVERY

A BLEND OF 8 AMINO ACIDS

L-Lysine - Low levels of lysine can result in poor exercise performance, muscle loss, rough coat and weak hoof structure.

L-Arginine - An arginine deficiency might impair the immune response and prolong infection, disease or illness.

L-Ornithine - Supports the production of anabolic hormones and reduces muscle stress and lessens fatigue during exercise.

L-Glycine - Increases the horse's muscle mass and overall performance while decreasing muscle repair time and degeneration.

L-Leucine - Helps to maintain blood glucose levels during exercise to increase endurance and reduce early fatigue.

L-Isoleucine - Promotes muscle growth and tissue repair, increases endurance, and stimulates clotting at wound sites.

L-Valine - Strengthens cognitive, immune and nervous systems, helping to decrease stress and improve focus.

L-Glutamine - Enhances nutrient absorption and maintains the gut lining to prevent pathogen leakage and systemic infection.

+ PROBIOTICS

Probiotics can help to maintain a healthy gut by promoting optimal digestive function and nutrient absorption. A healthy gastrointestinal tract in-turn supports the overall performance and well-being of your horse and prevents possible secondary health problems caused by harmful microbes and pathogens.

IMPROVE THE LIFE OF YOUR HORSE FOR LESS THAN \$1 A DAY!

Pivotal POWER+ for Equine Athletes is a dietary supplement blend of eight amino acids designed to improve the overall health and fitness of your active horse. All athletic horses undergo rigorous training programs to boost their performance over time. Feeding a daily supplement of high-quality amino acids can speed muscle tissue repair and increase muscle development. With POWER+, your horse will experience increased exercise capacity, quicker recovery after intense workouts and less soreness. POWER+ also increases focus, promotes responsiveness, strengthens hooves, enhances skin and coat condition, supports bone and joint wellness and improves your horse's immune and digestive systems.

This special blend of branched chain amino acids or BCAAs include three essential amino acids: valine, leucine, and isoleucine. They are essential, meaning they can not be produced by your horse's body and must be obtained from food and/or supplemented. Our proprietary blend of equine amino acids plus probiotics for gut health is the **ONLY** combination of its kind on the market today.

SUGGESTED USE: For horse use only. Feed 1-4 scoops daily as a top dressing over grain or hay. Serving size is based on average horse weight of 1,000 lbs. Shake well before using to maximize effectiveness. Do not use if inner seal is broken or missing.

MADE IN THE USA EXCLUSIVELY FOR PIVOTAL FEEDS
